2456 Hilgard Ave. Apt. 405
Berkeley, CA, 94709

Regarding:

Response to Request for Corrected Filing Receipt Confirmation Number 4559

US Application No. 10/710,560

Filing Date: 07/20/2004

Name of Applicant: David James Allison, Karmelit Belle Alon

Title of Invention: Automatic Derivation of Morphological, Syntactic, and Semantic Meaning from a Natural Language System Using a Monte Carlo Markov Chain Process

To Whom It May Concern:

Our initial application for the invention above contained 6 independent claims. This was an error in filing that slipped through our e-filing system. **Claims 4-6** were intended to be **dependent claims** of **claim 3**. Please consider claims 4-6 as dependent claims of claim 3. It is our understanding that if these claims are considered dependent claims, the initial filing fee covers the requested number of independent claims.

I have included the amendment claim structure in the attached pages

Thank you,

David Allison
